

Hi People ! I'm Mert Gör from Türkiye , İstanbul!

Figure 1: Mert Gör

I'm a systems programmer and Free Software leader candidate from İstanbul, Türkiye , who is deeply immersed in the world of internet and cloud computing. I'm passionate about the Free Software Movement, and my guiding motto is “**leaders more leaders.**” I'm committed to building and inspiring open infrastructures that empower everyone to take control of their digital destiny.

## About Me

- **Systems Programmer & Free Software Leadership:** I work full-time to lead global initiatives in Free Software and cyber security. I believe that true protection comes from having access to source code—if you don't have it, you can't truly secure it.

- **Philosophy:** My work is driven by the idea that our *social existence determines our consciousness*. This philosophy underpins my commitment to creating freedom-respecting solutions that champion openness over secrecy.
- **Cultural Explorer:** As I strive to become a world citizen, I embrace many human languages and diverse cultures, which enrich my open and collaborative approach.

## Projects & Initiatives

- **PSD (Procyberian Systems Distribution):** I lead to PSD driving this project to develop the next generation of Free Software. PSD is about ensuring that digital systems are free as in freedom, open, secure, and accessible for all humanity.
- **QB Networks:** Our team provides 24/7/365 cyber security solutions for the public, always prioritizing freedom-respecting practices.
- **Masscollabs Services:** A cloud platform dedicated to supporting and cultivating Free Software communities and projects.

## **Conclusion**

This profile and my projects are released under the GNU Affero General Public License version 3 or later. All my code is built on the principle that freedom starts with transparency—when you have access to the source, you have power over security.

I firmly believe that open communication and collaboration are the cornerstones of innovation. With every line of code, I strive to contribute to a digital future where knowledge is shared, security is inherent, and every person has the right to understand the tools they use.

Happy hacking, and let's keep building a Free Society with Free Software together!
